

DISINFECTION AND SANITIZING MISTING SYSTEMS

Portable and fixed engineering solutions

PORTABLE DISINFECTION SYSTEMS

Euspray has different portable fogging disinfection systems that guarantees complete disinfection and sterilization of different surfaces and areas. All our portable systems, can be used to disinfect and sanitize public transport, such as trains, planes, buses, airports, stations, schools, offices, etc.

ADVANTAGES

- 01 Fast and safe disinfection
- 02 Hygienic operation
- 03 Automatic system
- 04 Portable wheeled system
- 05 More effective than manual cleaning

RHCONTROL TOP

KEY POINTS

- Droplet size 5-30 μm
- Liquid level indicator
- 180° rotative spray gun
- 40L pressurized tank
- Control unit

REQUIRES

- Electricity supply (220V/50Hz)
- Compressed air supply

OPTIONAL

- Integrated compressor

RHCONTROL BASIC

KEY POINTS

- Droplet size 5-30 μm
- Liquid level indicator
- 180° rotative spray gun
- 20L pressurized tank
- Control unit
- Economical and lightweight version

REQUIRES

- Electricity supply (220V/50Hz)
- Compressed air supply

PORTABLE DISINFECTION SYSTEMS

RHCONTROL MANUAL

KEY POINTS

- Droplet size 5-30 μm
- Liquid level indicator
- Spray gun with anti-drip system
- 20L pressurized tank
- Extendible telescopic rod (2 meters)

REQUIRES

- Compressed air supply

OPTIONAL

- Portable compressor

RHSANI

KEY POINTS

- Droplet size 5-30 μm
- 2x E1 atomizer
- 10L pressurized tank
- Liquid level indicator
- Pressure regulator
- Economical and lightweight version

REQUIRES

- Compressed air supply

OPTIONAL

- 24L pressurized tank
- Portable compressor

PORTABLE DISINFECTION SYSTEMS

EU-SANEX

KEY POINTS

- Compact and lightweight
- 5L pressurized tank
- Integrated compressor
- 10m electric cable and spray gun with 9m cable

REQUIRES

- Electricity supply (220V/50Hz)

EU-SANITIZER

KEY POINTS

- Motorized model
- 110L pressurized tank
- 6,5h autonomous battery
- 1.30m surface coverage
- Controllable through the mobile app

REQUIRES

- None

OPTIONAL

- Lateral spraying

FIXED DISINFECTION SYSTEMS

Euspray also has a fixed misting disinfection system for different areas or spaces, such as large surfaces, hypermarkets, stations, airports, schools, large workspaces in the public or private sector, etc. These fixed disinfection systems, are designed to have little or no maintenance. The installation of such a system offers everyone maximum protection against viruses and diseases in daily lives.

ADVANTAGES

- 01 Reduced maintenance
- 02 Disinfection of surfaces and areas without wetting them
- 03 Fully automated
- 04 A customized system adapted to specific needs

BALLMIST

KEY POINTS

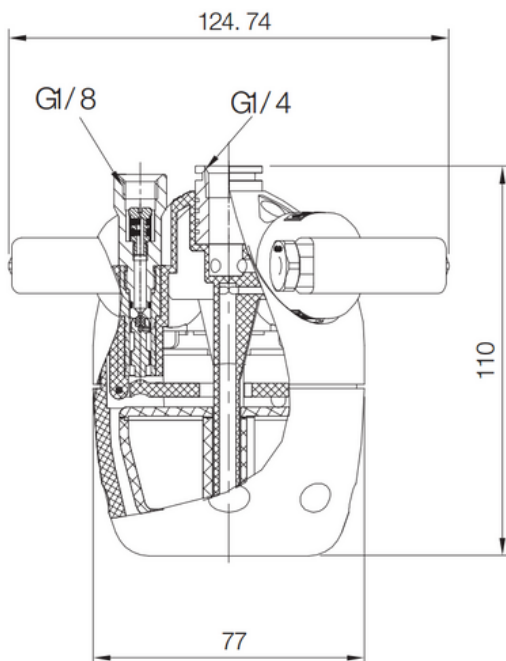

- Droplet size 5-7,5 µm onwards
- Compact and economical option
- 1-4 air mist atomizers
- Easy installation

REQUIRES

- Compressed air supply
- Liquid supply

OPTIONAL

- Pressurized tank for liquid supply
- Portable compressor

FIXED DISINFECTION SYSTEMS

EU-TUNNEL BASIC

KEY POINTS

- Remarkably fine droplet size 5-30 micron
- More efficient disinfection thanks to its pneumatics atomizers (E1)
- 50% less disinfectant consumption
- Built-in wheels for easy mobility
- Disinfect 2.500 people a day
- Not wetting (neither the clothes nor the floor)

INCLUDED

- 20 Lt. pressurized tank with level indicator
- Integrated compressor
- Photocell for starting and switching off
- Traffic light for on/off spray time

REQUIRES

- Electricity supply (220V/50Hz)

OPTIONAL

- Electronic hydroalcoholic gel dispenser
- Anti-slip mat
- UV-C lamp
- Thermographic camera
- Light and sound warning signal
- Human voice for instructions
- Exterior lighting
- Interior Lighting

Applus⁺

FIXED DISINFECTION SYSTEMS

EU-TUNNEL TOP

KEY POINTS

- Remarkably fine droplet size 5-30 micron
- More efficient disinfection thanks to its pneumatics atomizers (E1)
- 50% less disinfectant consumption
- Built-in wheels for easy mobility
- Disinfect 2.500 people a day
- Not wetting (neither the clothes nor the floor)

INCLUDED

- 20 L pressurized tank with level indicator
- Integrated compressor
- Photocell for starting and switching off
- Traffic light for on/off spray time
- Electronic hydroalcoholic gel dispenser
- Anti-slip mat
- UV-C lamp
- Thermographic camera
- Light and sound warning signal
- Human voice for instructions
- Exterior lighting
- Interior Lighting

REQUIRES

- Electricity supply (220V/50Hz)

Applus⁺

FIXED DISINFECTION SYSTEMS

EU-SPLIT

KEY POINTS

- Fine droplet size less than 30 micron
- More efficient disinfection thanks to its pneumatics atomizers (E1)
- 50% less disinfectant consumption
- Disinfect 450 people a day
- Not wetting (neither the clothes nor the floor)

INCLUDED

- 3 Lt. pressurized tank with level indicator
- Integrated compressor
- Photocell for starting and switching off

OPTIONAL

- Electronic hydroalcoholic gel dispenser

REQUIRES

- Electricity supply (220V/50Hz)

Applus⁺

FIXED DISINFECTION SYSTEMS

RHCONTROL 180°

KEY POINTS

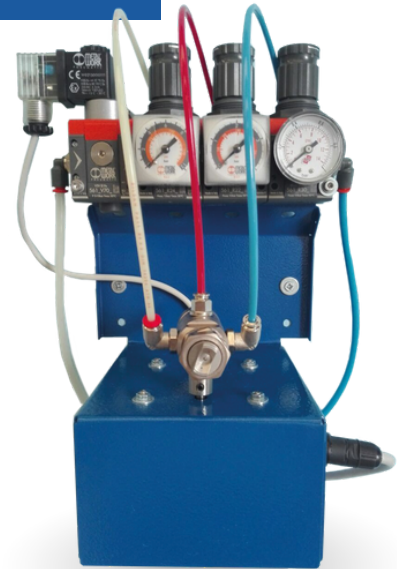

- Droplet size 5-30 µm
- 180° rotative spray gun
- Control unit

REQUIRES

- Electricity supply (220V/50Hz)
- Compressed air supply
- Liquid supply

OPTIONAL

- Pressurized tank for liquid supply
- Portable compressor

RHCONTROL 360°

KEY POINTS

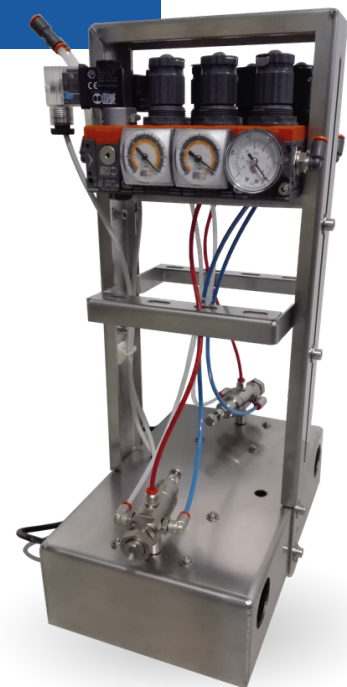

- Droplet size 5-30 µm
- 360° rotative spray gun
- Control unit

REQUIRES

- Electricity supply (220V/50Hz)
- Compressed air supply
- Liquid supply

OPTIONAL

- Pressurized tank for liquid supply
- Portable compressor

DISINFECTION ACCESSORIES

PNEUMATIC ATOMIZERS

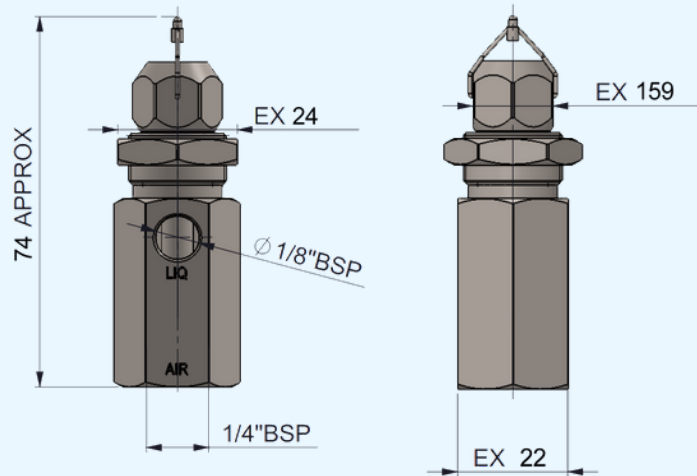

ULTRASONIC ATOMIZER

KEY POINTS

- Extremely fine droplet size 5-20 μm
- Long spray and coverage
- Great option for create disinfection tunnel

REQUIRES

- Compressed air supply
- Liquid supply

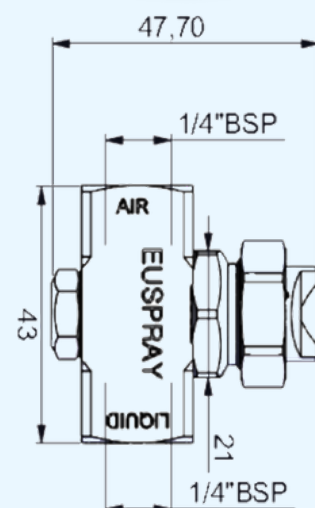

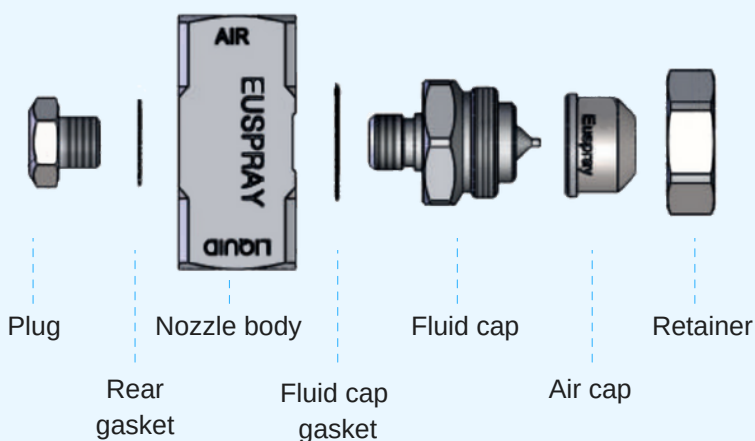

E1

KEY POINTS

- Extremely fine droplet size 5-30 μm
- Compact and economical option
- Easy installation
- Great option for create disinfection tunnel

REQUIRES

- Compressed air supply
- Liquid supply

DISINFECTION ACCESSORIES

HYDRAULIC ATOMIZERS

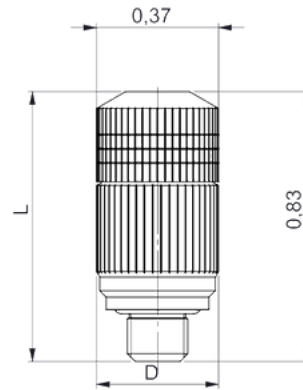

A

KEY POINTS

- Fine droplet size 10-30 μm
- Compact and economical option
- Does not need compressed air to operate
- Great option for create disinfection tunnel

REQUIRES

- Liquid supply

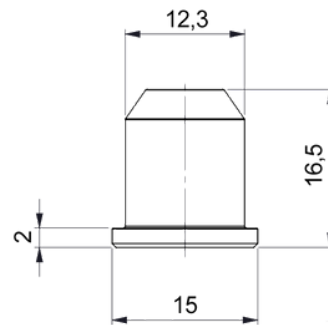

CX

KEY POINTS

- Fine droplet size 15-40 μm
- Compact and economical option
- Easy installation
- It's possible to add an anti-drip filter
- Great option for create disinfection tunnel

REQUIRES

- Liquid supply

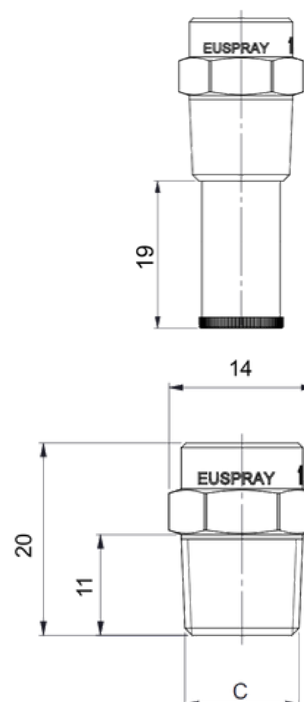

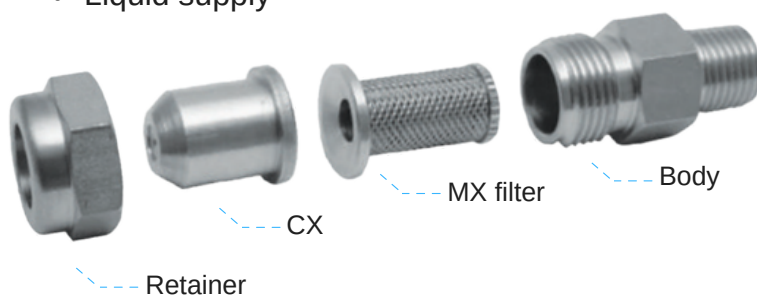

MX

KEY POINTS

- Fine droplet size 15-40 μm
- Compact and economical option
- Easy installation
- Great option for create disinfection tunnel
- It's possible to add a filter

REQUIRES

- Liquid supply

DISINFECTION ACCESSORIES

HYDRAULIC NOZZLES (FLAT JET)

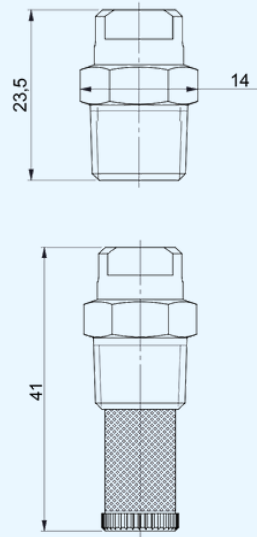

MC2

KEY POINTS

- Fine droplet size 20-50 μm
- Great option for create disinfection tunnel
- Economical
- Does not need compressed air to operate
- Can operate with low pressure
- It's possible to add a filter

REQUIRES

- Liquid supply

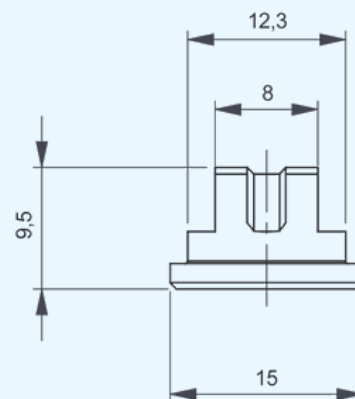

C1

KEY POINTS

- Fine droplet size 20-50 μm
- Great option for create disinfection tunnel
- Economical
- Does not need compressed air to operate
- Can operate with low pressure
- It's possible to add an anti-drip filter

REQUIRES

- Liquid supply

PRESSURIZED TANK

KEY POINTS

- Great option for spraying disinfectants
- Quick-connection for spraying accessories
- Three different sizes: 5L, 9L, and 18L

OPTIONAL

- Available model with wheels, level indicator, and spray lancet
- 50L pressurized tank
